

Southeast Regional Trunk Rehabilitation – RR232

PROJECT DETAILS

The ACRWC will install approximately 875 meters of new sewer pipe along Range Road (RR) 232, from the Legend's Golf Course entrance to Township Road (TWP) 540. This will twin the existing sewer along RR232.

Why is this project important?

The goal of the project is to increase pipe capacity due to Strathcona County development growth and the proposed Air Products Facility.

PROJECT TIMELINES

Construction commenced in February 2023 and is scheduled to be complete by December 2023. There will be work in two phases:

- **Phase 1, February – May 2023:** Trenchless install of the sewer line.

- **Phase 2, August – December 2023:** Open trench work along the west side of RR232, up to and including the intersection of TWP540.

WHAT TO EXPECT

Workspace

There will be some temporary and short duration single lane access, and additional trucks and equipment will be present. Work will be completed on the right of way.

Environmental Protection

As an environmental leader, the ACRWC is committed to following all applicable legislation and regulatory requirements. We are ISO 14001 certified for Environmental Management and we also hold this same high standard for contractors working on our behalf.

Trail Access

During construction, multi-use trail access will be impacted along RR232. To maintain a safe environment for both the public and on-site workers, trail bypass will be installed where required. Signage will be placed at existing access points to notify the public of what they can expect. Trail users looking for alternative options during the construction can visit www.strathcona.ca/trails.

There may be parking implications at the intersection of RR232 and TWP540 after August 1. This will be confirmed in May 2023.

Hours of Work and Noise

It is not expected that this work will create excessive noise. Our team will comply with County of Strathcona Noise Bylaw 66-99.

Safety

Work areas will be kept safe and secure and work will be conducted in accordance with Strathcona County bylaws, Alberta Occupational Health and Safety Requirements, and the ACRWC's safety policies.

WHO IS THE ALBERTA CAPITAL REGION WASTEWATER COMMISSION?

Established in 1985, the ACRWC is a not-for-profit commission operating under the Municipal Government Act that provides wastewater transmission and treatment services to approximately 330,000 residents in 13 municipalities within the Edmonton Area.
